

Connecticut Orthopedic Specialist lecture series: Latest Techniques in Imaging, Surgery and Physical Therapy Treatment

- March 21, 2013, 6-9 PM Wilde Auditorium, University of Hartford Dr. Paul Tortland: Musculoskeletal Ultrasound and its place in physical therapy treatment Live demonstration
- Introduction to musculoskeletal ultrasound (MSK), including indications and limitations
- Compare/contrast the use of diagnostic MSK ultrasound vs. MRI
- Discuss the implications for therapeutic interventions using MSK ultrasound
- Live demonstration of ultrasound during second half of session: audience participation
April 11, 2013, 6:30-9:30 PM Dr. Robert "Ted" Kennon: Anterior hip approach to total hip replacement. Focus on anterior hip replacement surgery and education on protocol for physical therapy
- Discussion of surgical procedure for anterior hip replacement
- Discussion on the reconstruction of the acetabulum and the femoral head and how it relates to the non-surgical side
- Benefits of the anterior approach from the perspective of alignment and soft tissue damage
- Review of Dr. Kennon's protocol for rehabilitation with focus on range of motion restrictions, strengthening and progressions and soft tissue and joint mobilization
May 14, 2013, 6-9 PM Dr. Michael Joyce: Hip arthroscopy, latest techniques in labral reconstruction, clinical presentation, biomechanical compensations and new physical therapy protocol
- evaluation and treatment including physical exam
- description of surgical reconstruction
- clinical presentations of labral tears
- clinical presentation of cam deformities and pincer deformities
- implications for young athletes with joint restrictions
- compensatory clinical presentations: case study (Paula Webster PT)
- review of post labral reconstruction protocol
June 11, 2013, 6-9 PM Dr. Jeffrey Thomson: Surgical techniques for scoliosis and outcomes, latest bracing techniques, classification of curves and physical therapy treatments
- Current protocol for scoliosis: from school nurse to orthopedic specialist
- Surgical interventions: different approaches
- Conservative approaches to scoliosis
- Bracing: different choices and curve types (Megan Chamis CO)
- Curve classification and physical therapy interventions (Paula Webster PT)

- Cost:
- \$299 for 4 lectures (12 contact hours)
- \$199 for choice of 3 lectures (9 contact hours)
- \$99 per lecture (3 contact hours/ lecture)
- Students: \$99 for 4 lectures OR \$25 for lecture of your choice
